COLLABORATIVE INNOVATION & ENTREPRENEURIAL TRAINING PROGRAM

This course is one in a series of courses offered as part of the Texas CTSA Collaborative Innovation & Entrepreneurial Program.

MANAGEMENT OF TECHNOLOGY

May 5 – June 27, 2014

REGISTRATION OPENS 4/1/14!

“Management of Technology” (HPTM 6290) is the first in a series of online courses designed to introduce participants to a broad range of topics related to management of technology and technological innovation in biomedical fields. The course will include discussion of technology development in industry, academia and government, the process of innovation, the drivers of innovation in a global environment, organizing and leading innovation, and incorporating technology change into a company structure and strategy. The 8-week course is offered through the UTMB Institute for Translational Sciences’ (ITS) Human Pathophysiology and Translational Medicine program as part of the Collaborative Innovation & Entrepreneurship Training Program. Contact the ITS Education Office to register: ctsa@utmb.edu or visit http://www.its.utmb.edu/, Career Development for details.

This Program is supported by:
UT System Novel Programs in Education for Innovation and Entrepreneurship (PI: Brasier, McPherson, Watowich) and NIH UL1TR000071 (PI: Brasier).
